TAIDEN HyCon System

TAIDEN HyCon System is an inclusive hybrid conferencing solution of blending on-site and remote attendees. It perfectly creates a seamless, collaborative and immersive conferencing experience for the remote participants by solving the frequent challenges in hybrid scenarios, such as seamless engagement of on-site and remote participants, poor audio quality, complexity in deployment and use and insufficient compatibility. The system allows for centralized meeting management by the moderator, synchronized voting and interpretation for online and on-site attendees, and real-time generation of complete meeting report.
